

Gabniks Motors Website — Full Project Documentation & Future Upgrade Guide

This document contains the full technical and deployment overview for the Gabniks Motors & Tech LLC website project. It serves as a maintenance, upgrade, deployment, and future development reference guide. Generated on: May 08, 2026

1. Project Overview

The website was built as a modern automotive locksmith and diagnostics business platform for Gabniks Motors & Tech LLC.

The website currently supports:

- Mobile responsive design
- Popup booking forms
- Automotive service cards
- Google Maps integration
- WhatsApp quick contact
- Facebook integration
- Phone call integration
- Formspree booking submissions
- GitHub version control
- Vercel cloud deployment
- Modern UI/UX animations and hover effects
- Responsive desktop and mobile layouts

2. Technologies Used

Frontend Framework:

- React.js
- Vite

Styling:

- CSS3
- Responsive Flexbox/Grid layouts

Hosting & Deployment:

- GitHub
- Vercel

Form Handling:

- Formspree

Version Control:

- Git

Development Environment:

- VS Code

Programming Languages:

- JavaScript
- JSX
- CSS

3. Website Structure

Main Sections:

1. Sticky Navigation Header
2. Hero / Introduction Section
3. Feature Cards Section
4. Main Flyer Image Section
5. Services Section
6. Booking Popup Modal
7. Google Maps Service Area
8. Floating WhatsApp Button
9. Footer Section

Popup Booking Modal Includes:

- Full Name
 - Phone Number
 - Email
 - Car Make
 - Car Model
 - Car Year
 - Location
 - Preferred Date
 - Preferred Time
 - Issue Description
-

4. Current Functionalities

Current working features include:

- Clicking service cards opens popup booking form
 - Form submissions are sent through Formspree
 - Booking submissions arrive through connected Gmail
 - WhatsApp button opens direct message
 - Call button opens phone dialer
 - Facebook button opens business page
 - Responsive mobile layout
 - Hover animations on cards
 - Full live deployment through Vercel
 - Automatic HTTPS security through Vercel
-

5. GitHub Repository Information

Repository Name:

gabniks-motors

Purpose:

Stores the full source code for:

- React components
- CSS styling
- Assets/images
- Deployment configuration

Important Git Commands:

`git add .`

Stages all updated files

`git commit -m "message"`

Creates a version checkpoint

`git push`

Pushes updates to GitHub

`git pull`

Downloads latest repository updates

6. Vercel Deployment Information

Vercel is currently used as the cloud hosting provider.

Current Live Website:

<https://gabniks-motors.vercel.app>

Benefits of Vercel:

- Free hosting
- Fast CDN
- Automatic HTTPS
- Automatic deployment

- GitHub integration
- Production-grade scalability

Deployment Process:

1. Push updates to GitHub
2. Vercel automatically redeploys
3. Live website updates automatically

7. Formspree Booking System

Formspree is currently used for handling booking submissions.

Current functionality:

- Customer fills form
- Form submits to Formspree
- Booking notification sent to connected Gmail

Advantages:

- No backend server needed
- Easy setup
- Low maintenance
- Free tier available

Future upgrade possibilities:

- Replace with database backend
- Add customer dashboard
- Add admin booking management
- Add automated SMS/email confirmations

8. Recommended Future Upgrades

High Priority Upgrades:

- Custom domain (.com)
- SEO optimization
- Google Business integration
- Customer reviews section
- Before/after gallery
- FAQ section
- Loading animations
- Better mobile navigation
- Google Analytics

Advanced Future Features:

- Admin dashboard
 - Booking calendar
 - Technician dispatching
 - Customer accounts
 - Invoice generation
 - AI chatbot assistant
 - SMS notifications
 - Database backend
 - Payment integration
-

9. Recommended Future Stack

For future scaling:

Backend:

- Node.js
- Express.js

Database:

- Supabase
- PostgreSQL
- MongoDB

Authentication:

- Firebase Auth
- Clerk

Payments:

- Stripe

Cloud Storage:

- Cloudinary

Maps:

- Google Maps API

AI Features:

- OpenAI API

10. Maintenance Guide

To maintain the website:

1. Open project in VS Code
2. Make code changes
3. Save files
4. Open terminal
5. Run:

```
git add .
```

```
git commit -m "Updated website"
```

```
git push
```

6. Vercel redeploys automatically

Important:

Always test:

- Mobile responsiveness
 - Popup form
 - Links/buttons
 - Maps
 - Booking submission
- after updates.

11. Business & Monetization Notes

This project is already at small-business production quality.

Possible website pricing:

- Beginner Website: \$300–\$800
- Business Website: \$900–\$2000+

Monthly maintenance pricing:

- \$30–\$150/month

The website can now be used:

- On social media
- On business cards
- On Google Business Profile
- For customer appointment booking
- For local business marketing

This documentation should be kept safely as the main technical reference for maintaining, scaling, and upgrading the Gabniks Motors website in the future.
